Lancaster Farming

VOL. 16 NO. 43 | Lancaster Farming, Saturday, September 18, 1971 | $2.00 Per Year

53rd Ephrata Fair Planned

The 53rd Ephrata Fair will be held September 21-25.

A highlight of the five-day event will be the colorful parade which will be held at 7 p.m. Wednesday, September 22 (Rain date - September 23), featuring high school bands; drum and bugle corps; marching units; Miss Lancaster County and Mrs. Lancaster County Fire Chief Contestants.

Daytime visitors to the fair will find many interesting displays of fruit, vegetables, flowers, needlework, home-baked and canned goods, art, crafts, models and 4-H and FFA exhibits which are displayed in store windows and exhibits buildings.

Tents located in the Ephrata Community Park will display cattle, sheep, swine, baby beef, poultry, seed, forage grain, and tobacco. Contests, judging of livestock and tractor driving contests will be conducted in Tent City daily.

"Kiddies Day" is held Thursday from 2 to 5 p.m., at which time youngsters up to 12 years of age will enjoy free rides as guests of local business and industry. The Mrs. Lancaster County Fire Chief Contest will be held Thursday nite.

Another highlight of the fair will be conducted on Saturday night at 8 p.m. in the Ephrata High School when young ladies from Lancaster County will vie for the title of Miss Lancaster County.

The newest models in farm machinery, trailers, campers, appliances, trucks and automobiles will be on display.

Pa. Dairy Princess Pageant, All-American Show Planned

Miss Marilyn Krantz, New Providence RD1, who is the current Pennsylvania Dairy Princess, and Miss Gayle Krogstad, Minnesota, the new American Dairy Princess, will participate in the coronation of a new Pennsylvania Dairy Princess Thursday evening, September 23.

Among contestants for the state dairy title in ceremonies at the Scottish Rite Cathedral, Harrisburg Miss Susan Kauffman, Elizabethtown RD1, the recently selected Lancaster County Dairy Princess.

A Miss Congeniality and runner-up will also be selected at the state contest.

The coronation will take place at the recognition banquet of the 8th annual Pennsylvania All-American Dairy Show September 20-24. While the banquet will be held at the Cathedral, the show will be held at the Farm Show Building. The banquet recognizes class award sponsors and outstanding herdsmen.

Wisconsin, with 30 Holstein cattle registered, will be a new entry in the Pennsylvania All-American.

Wisconsin will be represented in the All American and the Eastern National Holstein Show. The latter event, one of three such held in the nation, is being staged concurrently with the All-American.

Lampeter Fair Set Sept. 22-24

The 47th annual West Lampeter Community Fair is scheduled for Wednesday, September 22nd through Friday, September 24.

At the strictly educational fair, a wide selection of displays will be scheduled including livestock, grain, vegetables, fruits, nuts, home and dairy products, domestic arts, and school exhibits.

Exhibits will be received from 7 to 10 p.m. Tuesday and from 7:30 a.m. till 1 p.m. Wednesday.

Judging activities for 4-H and FFA members begin at 7 p.m. Wednesday with the Baby Beef show.

At 8:45 p.m. Wednesday there will be lots of action with a calf roping demonstration. Following this, the calves will be placed in a ring and boys will compete in a calf scramble.

Dairy cattle judging is scheduled to begin at 1 p.m. Thursday. The FFA calf award will be held at 11:45 a.m. Thursday.

The show will conclude at 8 p.m. Friday with the FFA fat hog consignment sale. There will be numerous other events, including a talent contest and queen contest Thursday evening.

Hastings Brothers' Hogs Winners

Mike and Brian Hastings, Kirkwood brothers, took several top honors in the Solanco Fair Hog Show Thursday.

Showing Chester Whites, Mike won the grand championship of the show, while Brian took reserve grand championship awards.

Mike's hogs also won the champion pen of two class.

The heavyweight champion pen of four sent to John Dilworth.

John also was named champion showman, with Clyde Dearoff taking the champion fitter prize.

A total of 52 hogs were entered in the show. All were sold Friday at the fair grounds.

Kim Weaver, Nine-Year-Old 4-H'er, Wins Baby Beef Show

Kim Weaver, Quarryville RD2, shows off her Hereford after it was named grand champion at the Solanco Fair this week. She previously won the 4-H competition.

A nine-year-old, first-year 4-H member took the top spot in the Solanco Fair Baby Beef Show Thursday.

She is Kim Weaver, daughter of Mr. and Mrs. Jason Weaver, Quarryville RD2.

Young Kim first won the 4-H Hereford heavyweight class, then the breed championship and overall 4-H championship.

As the judge was pondering his choice for grand champion of the show, a young Angus broke his halter and toppled Kim as he headed for his stall in the tent.

Except for a few tears and a sore ankle, Kim appeared to be unhurt and quickly returned to the show. The judge had made his decision and promptly indicated Kim's steer as grand champion of the show.

Kim's steer was one of a group bought through 4-H in Colorado.

Donald Dorward, Quarryville RD2, showed Angus in both 4-H and FFA classes. His animals did well in both areas and were

Green Dragon Hay Market

Friday, September 10

Nine loads hay, including: Few loads Alfalfa, 33.00-38.00; two loads Timothy, 29.00-38.00; two loads mixed hay, 32.00-39.50.

Two loads straw, 37.00.

Six loads ear corn, 45.50-47.50.

Ortho's fall fertilizer Offer!

Extensive research has demonstrated that where losses of fall-applied nitrogen have occurred in fields suitable for fall plowdown (that is, other than sandy soils, steep slopes, land that floods, or organic soils), the maximum loss has been less than 20%

If your young growing corn in the fields where you have followed the Ortho "Green 'n Easy" program shows nitrogen deficiency next spring, we'll correct the deficiency by giving you — free — enough nitrogen to equal 20% of that which you applied as Unipels this fall

So, protect your fall fertilizing investment this year with a "Green 'n Easy" fall plowdown program Visit with us soon and learn if your fields qualify

Omaha Cattle

Thursday, September 16

Compared with last weeks close closing prices on slaughter steers were 25-50c lower, the least decline on high-choice and prime 1150-1300 lb steers Heifers closed 75-1 00 lower Cows were 50-75c higher and bulls steady. A somewhat expanded feeder supply brought fully steady prices.

Four day receipts 21,700 as compared 15,400 previous holiday week and 23,300 a year ago. Slaughter steers approximately 36 percent of four day supply, heifers 41 percent, cows 10 percent, and feeders 10 percent. Fed cattle prices were forced downward by a bearish declining trade on carcass beef at wholesale level as slaughter under federal inspection continued to run at near a record level and well above a year ago. Buyers were cautious and selective as they sought to maintain an acceptable ratio between current live prices and carcass realizations. Fairly liberal showing choice steers and heifers, but high-choice and prime relatively scarce with well finished steers over 1250 lbs a rarity.

Average cost slaughter steers first three days 32.31 average weight 1093 lbs as compared 32.44 and 1088 lbs previous week and 29.19 and 1091 lbs a year ago.

Market Steers

Steers — Four loads High Choice and Prime, U.S 3-4, 1068-1300 pounds, 34.50-34.65; 1090-1281, 33.60-34 00; few loads High Choice, 1159-1300, 33.10-33.50; Choice 2-4, 975-1250, 31.75-33 00; Mixed Good and Choice, 950-1225, 31.00-32.00; Good, 28 00-31.00; Holsteins 2-3, 28 00-29.00; Standard and Good, 26 50-28.00.

Heifers — High Choice and Prime U.S. 2-4, 858-1093 pounds, 31.85-32.50; Choice, 825-1025, 30.50-31.75; Mixed Good and Choice, 775-975, 29.25-30.50; Good, 25.50-29.50.

Cows — Utility and Commercial, 11.00-23.00; few Utility Dairybreds, 23.25; Canner and Cutter, 18.50-21.00; Mixed Cutter and Low-Utility, 21.25-21.75

Bulls — Utility, Commercial and Good, 25.00-27.00; few Commercial, 27.50; Cutter and Low-Utility, 23.00-25.00.

Feeder Steers

Prices fully steady on Feeder Cattle and Calves in moderately active trade under good demand. Outshipments approximately 2500 head as compared 1000 previous week, largely Steer and Heifer yearlings.

Steers — Three loads Choice and Prime, 555 pounds, 28 75; Three loads Choice, 416-487, 37.50-38 35; Choice, 625-816, 22.00-34 25; High-Good and Choice, 860-1088, 30 50-32 00.

Heifers — Choice and Prime, 481-573 pounds, 35-00-36.00; Choice, 452-620, 32.50-34.25; Good and Choice, 734-836, 29 00-29.25.

Local Grain

Thursday, September 16

These prices are made up of the average prices quoted by six participating local feed and grain concerns. It should be noted, however, that not every dealer handles each commodity. All prices are per bushel, except for ear corn which is per ton.

The average local grain prices quoted Thursday, September 16, are as follows:

	*Bid	*Offered
Ear Corn	40.00	46 00
Shelled Corn	1.27	1.48
Oats	.69	.80
Barley	.99	1.18
Wheat	1.41	1.57

*Bid is the price the dealer will buy from the farmer delivered to the mill. Offered is the price the dealer will sell for at his mill.

FUTURES TRADING

(Closing bids as of Thursday, September 16)

	Chicago Cattle	Chicago Hogs	New York Maine Potatoes	Chicago Fresh Eggs

U.S. Inspected Livestock Slaughter

For the week ending Thursday, September 13

	CATTLE	HOGS	SHEEP
Week to date	525,000	1,395,000	170,000
Same period last week	404,000	1,051,000	131,000
Same period last year	494,000	1,330,000	171,000

Estimated daily livestock slaughter under Federal Inspection.

Poultry Market Reports

Delmarva

Wednesday, Sept. 15

Ready-to-cook movement fair to good. Slaughter schedules well maintained on broiler/fryers despite heavy slaughter of breeder hens for Hebrew holiday needs at several plants. Less than trucklot prices unchanged on both Plant and U. S. Grade A. Advance interest slow in developing though occasional early negotiation reported unchanged from this week's levels. Live supplies fully adequate. Undertone steady. Pool trucklot prices for Thursday arrival in the New York area:

U.S. Grade A 28½-30 M 28½-29.

Plant Grade 27½-28½ M 27½-28.

Special packs including 1¾-2, 3½ lb. sizes TFEWR.

Eastern Pa. and N. J.

Wednesday, Sept. 15

Prices of light type hens unchanged to ¼ cent lower. Demand good for dressed product Offerings adequate but lighter than past couple of weeks however most plants operating at full capacity. Demand good for fully adequate offerings of heavy hens Prices paid at farm: Light type hens 4½-6¾ M 6½-6¾ in Pa., M 5-5½ in N J. Heavy type hens TFEWR.

New York Eggs

Wednesday, Sept. 15

Prices - wholesale selling prices unchanged to lower, cartoned prices unchanged. Undertone nervous and unsettled as the anticipated pre-Rosh Hashana holy day demand has failed to materialize to any degree to date. Trading stocks of extra large adequate with street sales currently being made from 39½-41 mostly 39½-40. Large whites fully adequate to ample although in a few instances, naturals were tight. Mediums in slightly better supply-demand levels following relatively heavy clearances to breakers at prices occasionally as low as 21 cents. Smalls fully adequate with standards and other types ample. Demand for bulk eggs slow to fair while carton orders lack desired aggressiveness.

Weekly New York Egg Market

From Monday, September 13th to Friday, September 17th

	Mon.	Tues.	Wed.	Thurs.	Fri.
WHITE					
Fcy. Ex. Large	41	42	42	42	43

Pa. Dairy Princess Pageant,

With Pennsylvania exhibitors taking part in the World's Dairy Exposition at Madison, Wisconsin, and walking away with a fair amount of prizes, a keen rivalry is developing between the two important dairy states.

Entries in the All-American at the Farm Show Building is expected to pass last year's total of 1,541. Besides the host state, at least 1f other states and Canada will participate, according to Show Manager Thomas W. Kelly. Kelly said that the tabulation of entries is incomplete: Deadline for entries was August 20.

Canada is returning to the All-American after a year's absence with four entries and a total of 21 Holstein cattle. The four exhibitors from Ontario are: R. Lee Montgomery, Dover Center; Earl Beirnes, Allenford; Glenafton Farm, Alliston; and Spring Farm Holsteins, Streetsville.

Total premiums offered is $58,344. Holsteins lead the breed premium list with $12,030 offered while Guernseys are second with $9,324 offered.

Kelly estimated that approximately 20,000 persons, including some of the nation's outstanding dairymen and herdsmen, will attend the All-American. Both admission and parking are free.

The schedule follows:

Monday, Sept. 20, the show opens with three main events scheduled: Invitational Youth Dairy Cattle Judging Contest, the Pennsylvania Junior Dairy Show, and the Invitational Brown Swiss Sale.

Tuesday, Sept. 21, Pennsylvania Black and White and Brown Swiss shows.

Wednesday, Sept. 22, Ayrshire and Guernsey shows and Invitational Jersey and Holstein sales.

Thursday, Sept. 23, Jersey, Milking Shorthorn and Holstein (through dry cow classes) shows and Recognition banquet (Scottish Rite Cathedral).

Friday, Sept. 24, Holstein show (milking and group classes).

Emphasizing conformation qualities and type relevant to more years of productivity from the individual animal, the show is sponsored by the Pennsylvania Dairy and Allied Industries Association in cooperation with the Pennsylvania Department of Agriculture and the Farm Show Commission.

Miss Townley Is Harvest Queen

Miss Patricia Townley, 16, daughter of Mr. and Mrs. Clay Townley, Willow Street RD1, was crowned Harvest Queen Wednesday night at the Solanco Fair.

A junior at Solanco High School, she played a guitar and sang, "So Far Away," in the talent portion of the contest.

Runner-up was Karen Herr, 16, daughter of Mr. and Mrs. Thaddeus Herr, Quarryville RD1, was runner-up, and Pamela Groff, 17, daughter of Mr. and Mrs. Owen Groff, Nottingham, was second runner-up.

Green Dragon Dairy Cattle

Friday, September 10

The Green Dragon market reported receipts of 125 head of cattle, attendance fair with prices steady to lower.

Consignments included:

Herd New Jersey springing heifers, 400-462.50.

Load Pennsylvania springers, 445-495.

Load Pennsylvania fresh cows, 320-572.50.

Load Virginia springers, 350-470.

Load Canadian cows, fresh, 475-660; springers, 392.50-680.

Load Canadian cows, fresh, 485-610; springers, 380-650.

Mixed load springers, 435-510.

Beef Cows

Beef cows and feeder market active with prices steady.

Progressive Parties Held, But More Money Needed

Fulton Grange sponsored Progressive Parties to benefit the Southern Lancaster County Family Health Center have now reached 140 and a total of $2,061.58.

The Health Center committee is voicing concern that the total in their fund as of September 11 had reached only $5,400 and the equipment and expense of remodelling the Health Center building will need to be paid by October 1 when the Center opens. They are urging organizations and individuals to get their contributions in as soon as possible.

Three of the five new physicians who will practice in the center will be featured on Fulton Grange's Booster Night program at 8:15 p.m. Monday, September 27 at the Oakryn hall. The public is invited. Dr. J. Kenneth Brubaker, Dr. Rogers D. McLane and Dr. John A. Wolgemuth will each tell about a phase of the Center and will thoroughly explain everything.

The following have held parties in the past three weeks: Mr. and Mrs. John L. Hess, Mr. and Mrs. Henry Rohrer, Mr. and Mrs. Fred Kreider, Mr. and Mrs. J. R. Shaeffer, Mr. and Mrs. Russell Adsitt Jr, Mr. and Mrs. Donald Trimble, Mr. and Mrs. Kenneth Rutt, Mr. and Mrs. Carlton Groff, Mr. and Mrs. Daniel Kachel, Mr. and Mrs. William Wilson, Mr. and Mrs. Walter Erb, Mr. and Mrs.William R. Coble, Mr. and Mrs. Samuel L. Metzler, Mr. and Mrs. Allen Graver, Mr. and Mrs. Marvin Murphy, Mr. and Mrs. Samuel Reinhart, Fulton-Grange Square Dancers, Mr. and Mrs. Fred Linton, Mr. and Mrs. Arthur Rohrer, Mr. and Mrs. Rome E. Howell, Mr. and Mrs. Earl H. Harnish, Mr. and Mrs. Benjamin Smith, Mr. and Mrs. Robert J. Landis, Mr. and Mrs. Jesse Cutler, Mr. and Mrs. K. Dieter Linde, Mr. and Mrs. James Lefever. Mr. and Mrs. Charles Reed, Mr. and Mrs. Vonley Ray, Mr. and Mrs. Blair Phillips, Mr. and Mrs Charles Frick, Mr. and Mrs. Victor E. Henry, Mrs. Ada Waltman, James and Miss Ruth King, Mr. and Mrs. Marion Eckman, Mr. and Mrs. Richard Glisson, Mr. and Mrs. Dwight Wagner, LeRoy Welk, Mr. and Mrs. Frank H. Peiffer, Mr. and Mrs. Clyde H. Miller, Mr. and Mrs. Kenneth Reynolds, Mr. and Mrs. Bruce Spencer, Mr. and Mrs. Lester Kachel, Mr. and Mrs. Martin Stoner, Mr. and Mrs. R. A Mendenhall, Mr. and Mrs. Joseph Metzler, Mr. and Mrs. Stanley W. Grill, Mr. and Mrs. Samuel H. Kreider, Mr. and Mrs. Emory D. Wagner, Mr. and Mrs. Jesse Murray, Mr. and Mrs. James E Frey, Mr. and Mrs. Robert N. Myers, Mr. and Mrs. James Wilson, Mr. and Mrs. Glenn C. Herr, Mr. and Mrs. Robert L. Braightmeyer, Mrs. Anna Armstrong, Mr. and Mrs. Raymond P. Landis. Donations amounted to $236 toward the fund.

Waldo shows his championship form at the Solanco Fair this week. Actually, the Saint Bernard wasn't entered in any competition, but Kathy Kreider, Quarryville RD1, shows the large dog was as halter-broken as any other animal in the show. Waldo is owned by Roger Shaub, a neighbor.

Mollie Is Winner at Solanco Fair

A three-year-old cow named Mollie was named Holstein grand champion at the Solanco Fair Wednesday.

Later that day, Mollie made a sensation by giving birth to a heifer calf, which was named Melissa.

The cow is owned by Robert Groff, Quarryville RD3, who said she will be sold at the All-American sale in Harrisburg Wednesday.

A cow owned by Marvin Miller, Strasburg RD1, won the

(Continued on Page 8)

Robert Groff, Quarryville RD3, shows three-year-old Mollie just after she was named Holstein grand champion of the Solanco Fair Wednesday. Several hours later, Mollie became a big hit of the fair by giving birth to a heifer calf, which was named Melissa. The cow, Groffdale Marquis Mollie, will be sold at the All-American sale in Harrisburg Wednesday.

Roger Shaub, Quarryville, shows his grand champion Jersey, a five-year-old, at the Solanco Fair. Joyce Wagner, showing for her husband Robert, captured the Guernsey grand championship with this three year old, which was also judged to have the best udder.

Grace Ann DeLong, 11, Quarryville RD1, was named champion showman for first and second year 4-H members with her nine-month-old heifer Julie.

This six month old Guernsey calf nudges her owner, Clark Coates, Nottingham RD2, at the Solanco Fair Wednesday.

ALL NEW BEACON PULLET CAGE SYSTEM

One day old to twenty weeks, 20 birds per single deck cage. This is the most economical and labor saving system on the market. The automated system includes the winch suspended Beacon auger pan feeder, one pan per 24" x 36" cage, and the Hart cup watering system. Features of single deck pullet cage system from one day old to twenty weeks:

- Only two adjustments—from one day old to twenty weeks
- Safety lock hinged doors
- ½ x 2 galvanized mesh floor
- Sturdy channel suspension or stands
- One or two Hart cups per cage
- One 8" pan per cage
- Winch feeder adjustment
- Can use hot water or hot air heating systems
- Flex auger feeders
- More uniform pullets
- Most advanced engineered chick-pullet system available
- Easy ventilated
- Greater cubic inch of bird area
- Start chicks directly on feeder
- Easy assembly

Ayrshire grand championship.

The Brown Swiss grand champion was shown by Fred Edwards, a Solanco Chapter FFA exhibitor.

Ellen Schmuck, Peach Bottom RD2, took grand champion honors for Jerseys with her intermediate calf

The Grand Champion Guernsey was a three-year old owned by Robert Wagner.

Donna Akers, Quarryville RD1, was named all-around fitting and showing champion and Debbie Crider, Nottingham RD1, champion fitter of the show.

A total of 92 cows were entered in the show. Judge was Howard Wise, Lebanon County.

Fred Edwards, left, Quarryville RD1, shows his Brown Swiss grand champion and Leroy Welk displays the Ayrshire grand champion. Owned by Marvin Miller, Strasburg RD1, the Ayrshire is a five year old. The Brown Swiss is 10 months old.

USDA Announces Bee Payments

The U.S. Department of Agriculture has announced an indemnity payment program for beekeepers whose bees are killed by pesticides used near their bee colonies.

The program was made retroactive to cover bee losses dating back to January 1, 1967. It is authorized through 1973.

Regulations containing terms and conditions of payment have been filed with the Federal Register. Beekeepers may apply for payments at county Agricultural Stabilization and Conservation Service (ASCS) offices.

A beekeeper is eligible for indemnity payment if he suffered a loss of honey bees under the following conditions: If he used pesticides, but this use in no way contributed to the loss of his bees; he took reasonable precautions to protect his bees from exposure to pesticides if he had advance notice that pesticides were going to be used near his bee colonies, and that after exposure he took reasonable action to reduce the bee loss; ;the loss of bees was due entirely to the use of pesticides, not partially due to some other cause. The beekeeper may prove loss of his bees by pesticides in a number of ways specified in the regulations.

The amount of indemnity payment to an eligible beekeeper will depend on the extent of damage to a colony or queen nucleus (colony), or will be determined by the ASC county committee on the basis of replacement cost of the bees destroyed, loss of sales of honey and beeswax, loss of pollination fees, and loss of sales of queen bees and packaged bees.

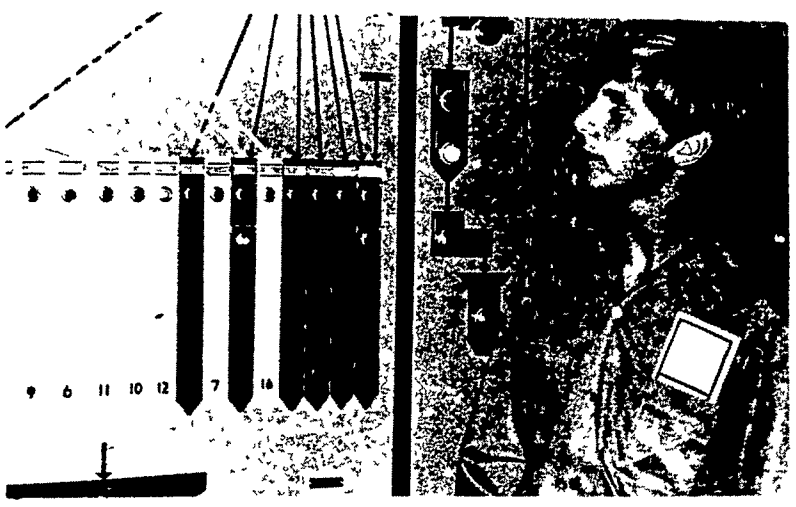
Allied Mills Holds Open House for Wayne Feed Plant Here

Open house and dedication ceremonies for Allied Mills' new Lancaster feed manufacturing facility were held Tuesday with Roy E. Folck Jr., president and chairman of the board for the Chicago-based agribusiness firm, welcoming the estimated crowd of about 3,000 persons.

The new feed plant, designed to serve a 30-county area of southeastern Pennsylvania, New Jersey, Maryland and Delaware, has a production capacity of more than 80,000 tons per year, according to Donald L. Staheli, vice president and general manager of the Wayne/East feeds division.

The ultra-modern plant is highly automated and is run from a master control panel which directs the operation of the entire production facility.

The mill is equipped to manufacture both bulk and bag feeds.



Robert Burkhart, East Earl RD1, part of the delegation from the Grassland FFA Chapter, inspects part of the complex control center of the new Wayne Feed Mill.

Two vice presidents of Allied Mills, producers of Wayne Feeds, present at the open house for the new Lancaster mill Tuesday are: Don L. Staheli, left, vice president and general manager of Wayne East, and Dr. Merle Brinegar, vice president of research.

Bob Barnes, manager of the new Lancaster plant, points out a feature of the new mill to an interested visitor.

Opening of the new plant follows operation for several years of a company warehouse on the site in the Lancaster-Hempfield Industrial park.

Heading the production staff as plant manager of the new facility is Robert H. Barnes, a veteran of Allied Mills who formerly managed the company's Memphis, Tennessee, plant. Plant superintendent is Don Rose. The Lancaster region sales team is headed by regional sales manager, R. A. Psolla, and Max C. Barnett, manager of business development.

Allied Mills operates more than 30 feed plants in the 37 states that constitute the Eastern two-thirds of the United States. The company is a major factor in the production of broiler and poultry meat and is a processor of soybeans and dehydrated alfalfa.

Ed Kraynak, Eastern region quality control supervisor, demonstrates the use of an air oven for feed moisture tests during an open house tour of the new Wayne Feed Mill Tuesday. The tests help maintain a constant moisture level in the feed. He explained that Wayne emphasizes an outstanding quality control program.

Price Freeze--Farmers Exempt?

Since the President's price freeze about a month ago, there has been much speculation about what it means for farmers. Farmers were given special status in the new economic policy by having raw farm products exempted.

One of the first issues to emerge was the question of what constitues a raw farm product. The general rule has been that any basic farm commodity which has not been further processed for retailing is a raw farm product. This includes both animals on the hoof and grain directly out of the fields.

But the price of the retailer's product, including fresh, frozen or processed meat at the store or feed from the manufacturing plant, come under the rules and in effect have a price ceiling based on prevailing prices before the August 15 announcement.

It is now generally conceeded that the actual effect of this policy is in fact to impose a price ceiling on animals on the hoof and on grains. This is true because retailers and feed manufacturers must continue to maintain reasonable returns; if the price of raw farm products rises to the point where these price returns are endangered, the buyers of these farm products simply quit bidding on them. This in fact imposes a ceiling on the price of raw products, although it is somewhat more flexible than on those items which actually come under the president's price freeze.

As H. Lewis Moore, Penn State marketing specialist explains in a recent livestock information marketing bulletin, "When livestock prices move higher, the packer cannot pass the increase on to the retailer (and then on to the consumer) if his wholesale price is now at the high point reached during the 30 days prior to the August 15 freeze. If the packer pays more for livestock, he reduces his own margin. Since raw material (livestock) makes up 80 to 85 per cent of their cost, packers may offer considerable resistance to paying higher prices for livestock during the freeze."

Moore goes on to point out that exempted raw farm products are also continuing to be governed by the law of supply and demand, and that the supply is expected to be up in the next several months. Wheat production is estimated at 16 per cent greater than in 1970, barley up 13 per cent, sorghum grain up 20 per cent, and corn up 30 per cent over last year. If these projections continue to hold true, it would indicate falling grain prices in relation to last year when prices were artificially up because of the corn blight scare.

Also, our reports indicate that the grain harvest in some other nations is up from last year, indicating a reduced potential for exporting grain surpluses abroad.

Initially, bountiful grain harvests should spell much lower feed costs for livestock and poultry producers, but in the longer run, in six to 12 months, it should result in bidding up the price of feeder stock and eventually result in more animals at higher weights, as farmers feed out their low-priced grain supplies.

Thus, it would appear at present that there is in fact a price ceiling on raw farm products and that first grain, and eventually livestock, will be priced below the ceiling because of increasing supplies.

This changing situation will affect each farmer differently, depending on the type of operation he has. The farmer should continue to watch the situation closely, because his response could play a large role in the profitability of his operation in the next several months.

A Good Livestock Market?

Forecasts continue for an unusually large grain harvest, particularly a record corn harvest at 12 per cent over the previous record in 1967. It will mean a drastically changed situation for livestock producers over the next year in relation to the past year.

During the past year when corn prices were unusually high, often in the $1.75 per bushel range or higher, it was often questionable whether a farmer could make more money by feeding his grain through livestock or by selling it direct.

This was particularly true in relation to hogs, which were also very low priced because of an oversupply. Using the old recognized ratio of 10 bushels of corn equaling a hundred pounds of pork, there were times recently when pork producers could have made more money by selling their corn direct and avoiding all the cost and labor of feeding it.

But with the price of corn suddenly declining and with a record harvest forecast, the profitability of feeding corn may rise sharply over the next several months. All farmers should remain aware of this changing situation and how it effects their operations.

One situation in particular which farmers should anticipate is that if the grain surplus regions in the west and midwest come up with a bumper grain harvest as expected, farmers in these areas likely will begin acqquiring more livestock for feeding. This is likely to occur particularly in areas, such as Illinois and Indiana, which were hard-hit by blight last year. Areas and farmers with unusually low supplies of corn and grain last year tended to hold down numbers of livestock on feed; with a low-priced bumper crop, they can be expected to begin feeding at previous high levels.

If this occurs, it will almost inevitably bid up the price of feeder stock in the coming months. Local farmers should watch this situation and if it begins to occur, they should try to plan their own operations so as to get ahead of the rush.

Also, if there is a move toward increasing the feeder operations, it could temporarily reduce the number of livestock actually available for slaughter. This would tend to keep prices up until the larger number of animals begin reaching the market. If this trend occurs, livestock markets may be unusually strong in the next several months.

As farmers know from experience, projecting these trends and trying to profit from them is an extremely tricky and risky art. But we think that if ever there was a time when the future market condition of the livestock industry could be predicted, now is it.

During the past year, grain supplies dropped sharply, feed costs rose sharply, demand for feeder stock dropped sharply. Bolstered by high feed costs and restrained livestock supplies, livestock prices remained good in the face of sluggish consumer demand.

During the coming year, grain supplies will rise sharply, feed costs will drop as Eastern Shore corn is already arriving and as midwest corn reaches this area in late October, demand for feeder stock will rise sharply. As the national economy picks up, unemployment declines and consumer demand rises, livestock producers temporarily face the pleasant prospect of rising demand and lower costs, a situation which farmers will quickly try to overcome with increased production.

NOW IS THE TIME..

By N. Alan Bair
Assistant Ag. Agent

To Prepare For Corn Picking

Corn picking time will be here before we know it and now is the time to get the corn picker in good working order, as well as preparing the available storage. The harvesting equipment should be gone over thoroughly to be sure it is in top working order. Severly worn or broken parts should be replaced or repaired. It would save a lot of valuable time during the picking season to purchase "questionable" parts now so a lot of time is not lost during a breakdown. A good way to systematically inspect the machine is to thoroughly lubricate it.

Storage facilities for the new crop should also be prepared at this time. Cribs and bins should be cleaned and repaired. Provisions should be made so old dry corn is not "buried" where it will not be available for use first before the new grain. Possible sources of rodent damage should be checked out and corrected. Good housekeeping is one of the best defenses against rodent damage.

To Have Soil Tested

Farmers who have their soils tested in the fall will be ahead of those who wait until spring. By testing now you will have the winter months to plan next season's fertilizer program. Having sufficient time to plan often means the difference between a successful fertilizer program and a poor one.

Another important advantage of testing now is that if the soil test indicates a need for lime, autumn is the ideal time to apply it. Lime added in the fall has plenty of time to begin its reactions on the soil before spring planting season. Where soils need phosphate and potash for better crop yield, fall applications of fertilizer are a good idea.

To Install SMV Emblems

Farmers and other persons operating slow moving vehicles are reminded that it is now a law that such vehicles must display the approved slow moving vehicle (SMV) emblem.

The emblem is transferrable from one vehicle to another. It is relatively inexpensive and may be purchased at most implement dealers and farm supply firms.

Be sure to keep all SMV emblems in good condition. A dirty, faded and perhaps damaged emblem is little better than no emblem at all when it comes to warning following drivers., A damaged emblem should be replaced or resurfaced with new material if metal backing is sound. Replacement emblems or new center or border materials are readily available from many farm supply stores and farm equipment dealers.

THE BIBLE SPEAKS
International Uniform Sunday School Lessons
BY LAWRENCE W. ALTHOUSE

TO SEE THE UNSEEABLE

Lesson for September 19, 1971

Background Scripture. John 1:1-18.
Devotional Reading: Isaiah 40-12-31.

A little boy was being reminded for the umpteenth time not to put his fingers in his mouth because his hands were dirty and there might be germs on them. "Oh for Pete's sake," the little boy burst forth, "God and germs! God and germs! That's all I ever hear: God and germs — and I've never seen either of them!"

Rev. Althouse

We can sympathize with the little fellow for we can appreciate how puzzling it must be for children to be asked to believe in someone whom they cannot see. Still, on the other hand, we also ask them to believe in germs, too, and they can't see those either.

The Word

From his earliest days man has believed in things and persons who were unseen and unseeable. The reason for this belief has been God's tireless efforts to reveal himself to man. "In the beginning was the Word" (John 1:1)—from the very beginning God has tried to make himself known to his creatures. He has "spoken" to men in nature, in dreams, in mighty deeds, in laws and literature, and in human thought. All of these channels of revelation have revealed glimpses of the truth to men. They have convinced men of the existance of unseen realities.

Yet men are not satisfied usually unless they can see with their eyes and hear with their ears. They may be thrilled with lofty ideas and stories, but still they want something more concrete, more specific. It was to meet this need of men that God spoke through that most revealing of all his creations—a man! "And the Word became flesh and dwelt among us, full of grace and truth" (1:14).

To make Him known

Men had gained some understanding of the nature of God through the wonders of the natural world. They had been led closer to him by philosophies and laws and man's imaginative creations. Yet God was still unseen and unseeable. It was thus the purpose of the Incarnation—the Word became flesh—to help men to see the unseeable. "No one has ever seen God; the only Son, who is in the bosom of the Father, he has made him known" (1:18).

This doesn't mean that Jesus was the only revelation of God, but that he is the fullest, revealing to us all that we need to know and can know of God. Thus: "In many and various ways God spoke of old to our fathers by the prophets; but in these last days he has spoken to us by a Son . . . He reflects the glory of God and bears the stamp of his nature" (Hebrews 1:1-3).

In Jesus Christ man is enabled to see the unseeable.

(Based on outlines copyrighted by the Division of Christian Education, National Council of the Churches of Christ in the U.S.A. Released by Community Press Service.)

Farm Being Developed

The Virginia Tech College of Architecture is reported helping to develop the Ambassadors Paradise Farms near Paradise as a recreation area for Chinese students and Christians.

An Ambassadors for Christ spokesman said this week that the old farmhouse and grounds has been converted to a dormitory which can sleep 50 persons. A chapel has been constructed. Obsolete farm buildings have been torn down. Excavation of a lake has begun.

Voracious Fish

Schools of piranha, a fish common to the entire Amazon Basin, can strip a wounded animal or man to a skeleton in minutes.

Fulton Grange Reelects Holloway

Fulton Grange, meeting September 13 at Oakryn, reelected Richard Holloway Master for the coming year.

Other officers who will be installed at the October 11 meeting are; Junior matron, Mrs. Jacob - Fantom; overseer, James - Huber; Lecturer, Mrs. J. Stanley Stauffer Jr.; Steward, David Knight; Assistant Steward, Lloyd Welk; Chaplain, Gyles Brown; Treasurer, R. Clair Murphy; Secretary, Mrs. Charles McSparran; Gatekeeper, Donald Reath; Ceres, Joyce Galbreath; Pomona, Miss Peggy Jackson; Flora, Mrs. Rebecca Quinn; Lady Assistant Steward, Miss Donna Welk; Executive Committee Member, Norman Wood; Finance Committee Member, Richard Lefever; Pianist, Mrs. Richard Lefever; Trustees, David Wissler and Thomas Galbreath; Purchasing Agent, C. G. McSparran; Hospitalization Secretary, Mrs. Robert McSparran; Flower Committee - Mrs. Mary Giffing and Mrs. Anna Armstrong; Librarian, Mrs. C.Richard Hanks and Scout Representative, Richard Nye.

The youth committee announced that the Philadelphia baseball game August 27 was rained out and they are rescheduling the bus trip for September 28 to see the Pittsburgh- Philadelphia game.

There were five colored photo entries which will compete in the Pennsylvania State Grange contest.

J. Robert Reed, accompanied by Mrs. Richard Jackson, played a medley of songs on his violin. He was then presented a decorated cake in observance of his 87th birthday. Mrs. Clifford W. Holloway Jr conducted a quiz and games.

The last of the county Grange visitation meetings will be held September 21 at the Quarryville Fire Hall under the direction of Colerain Grange. Salisbury Grange will present the program and Fulton Grange officers will open and close the meeting. The Pomona chorus will hold rehearsal at the conclusion of that meeting.

New Asgrow RX Line hybrids — the corn-profit prescription you asked for

New RX hybrids . . . disease resistant by design not by accident . . . prescription-bred to give you what you've always wanted in hybrids: Genetic characteristics to help you cope with the complex problems affecting your corn production.

RX 85 "NORMAL CYTOPLASM" in 1972 prescription-bred for this area and your farm

RX 85 is an extremely uniform special cross—a record performer you can put your trust in. It's prescription-bred for high profit potential and disease resistance—including Race "T" Southern corn leaf blight. ☐ An excellent yielder with good tolerance to MDM. ☐ Uniform, medium-tall plants with semi-upright leaves stand exceptionally well. ☐ Medium- to smooth-dent kernels have high test weight. ☐ A real profit producer, it is excellent for picking and combining. As an experimental hybrid in 1970 on Normal Cytoplasm, this variety produced 177.4 bu/acre at Manheim, Pa. Asgrow Research and Development Test Plot.

RX 85's Early-Season Zone Twin

RX 60

Produced from plants with normal cytoplasm to provide resistance to Race "T" Southern corn leaf blight, this hybrid offers superior blight resistance It grows well in narrow rows and at high populations and has excellent resistance to stalk rots The medium-dent kernels have a good test weight and the grain dries exceptionally fast at maturity

1970, asan "N" Cytoplasm Hybrid yielded 173.5 bu/a. to out yield 24 other varieties by 10 bu/a. in Asgrow Research Plot.

RX 85's Full-Season Zone Twin

RX 99

A prescription-bred, pure single cross, RX 99 is produced from the same, but reselected inbreds as IXL 9—reselected for more uniformity, better seed vigor, and higher yielding ability It is resistant to Northern and Southern (Race "T"), leaf blights and tolerant to MDM Medium-height plants with thick, sturdy stalks and massive roots mean good standability—even under stress Large, heavy ears have high test weight, medium dent kernels An excellent picking or combining corn with a yield potential over 250 bushels per acre.

You may have seen RX 60 At the recent AG-PROGRESS Days, State College

Are your beef cattle programmed for profits?

There is a program that will give your cattle the exact balance between feed and forage for maximum growth and profit. Whether yours is a cow-calf operation, or you're finishing cattle for market, Red Rose's unique new service can take the guesswork out of your feeding operation.

You tell us about your herd. The breed. Average weight. The gain per head you want to achieve. What forage you're feeding and how much. Give us these facts and we'll analyze your herd and tell you how you can obtain the most efficient, profitable operation possible.

Your present feeding program may be the best possible one for your herd. But, if you're not absolutely sure, let us compute it the Red Rose way. This scientifically formulated analysis is free.

Researcher Tells:

How to Get Maximum Corn Yields

At a local Trojan seed corn meeting this week, farmers were told that achieving maximum yields depends largely on following several basic management practices.

Dr. Dave Nanda, Trojan research director, said these practices include:

— Fix a realistic goal of how much corn should be grown on a particular piece of ground. Determine the yield potential of the soil by testing it and getting the advice of competent persons, such as Extension agents.

— Fertilize to make sure that the ground has enough nutrients of various types to produce the maximum yield sought. For instance, a 150 bushel per acre corn crop uses up 200 pounds of nitrogen, 100 pounds of phosphate and 125 pounds of potash per acre. If these levels of nutrients are not in the ground, the farmer cannot expect to get 150 bushels, Nanda explained.

— Plant early. All the plant's leaves should be out by June 21, the longest day of the year. The greatest amount of sunlight is available the 15 days before and after June 21. The corn needs this maximum amount of sunlight in order to achieve maximum yields, Nanda said.

— Control weeds, insects and diseases. These rob yields. While the introduction of nearly all N seed next year should eliminate Southern corn blight, farmers can still expect trouble from Northern leaf blight and perhaps yellow leaf blight, Nanda said He noted that some corn varieties are showing resistance, however, particularly to yellow blight. He also noted the importance of controlling corn rootworm.

— Use proper harvest procedures Proper operation of harvesting equipment can save 10 bushels per acre, he stated.

In other comments Nanda was critical of the use of machines for detasseling seed corn. He said the machines tend to cut off several of the top leaves; since 95 per cent of the corn crop is made from leaves above the ear, loss of these top leaves "will reduce the vigor of next year's crop." He said his firm hired several thousand youths this summer for hand detasseling.

Nanda also urged farmers to realize the difference between what he called a single cross and a modified single cross. He explained that the modified cross can be produced much cheaper because the seed crop yields more per acre. But he told farmers that they can normally expect a reduced yield from a modified single cross as compared to a single cross.

While Nanda urged farmers in Southeastern Pennsylvania to use N seed next year, he indicated that T seed will be available. He projected that much T seed probably will be used in the western dry areas and northern areas where Southern blight has not been a factor, and where the lower priced T seed will get as good results as the higher priced N seed.

He said he would anticipate that no-till fields would have a higher incidence of insects and disease problems than plowed fields.

While this part of Pennsylvania is experiencing much blight damage, Nanda said most of the country is having less blight this year because N corn was used extensively in the Southern states. This kept blight under control in the South so that it didn't blow North as much as last year.

On the question of why a farmer with two N fields had one damaged and one not damaged by Southern blight this year, Nanda said the damage may have occurred from the yellow blight. If it actually was Southern blight, it probably means there was a mistake and the seed probably was not actually N seed, he said.

Following the brief talk in a corn shed on the Eugene Hoover farm near Neffsville, Nanda led a tour of test plots of various Trojan varieties, commented on each and made recommendations on how to use them.

Eugene Hoover, left, local Trojan seed representative, and Alton D. Carl, owner of Carlton Seed Company, distributor of Trojan seed in eastern Pennsylvania and New York, examine some Trojan TXS 113, considered one of the firm's best varieties. This variety has long kernels and a relatively small cob, a trait which the company attempts to develop.

Local farmers listen as a Trojan representative discusses the merits of various varieties of corn seed available to farmers.

Dave Nanda, Trojan seed research director, emphasizes a point to local farmers.

Hardin Explains Price Freeze and Farmers' Role in Fighting Inflation

Exemption of raw agricultural products from the wage-price freeze shows that the highest councils of the government recognize the farmer's contribution toward preventing inflation, Secretary of Agriculture Clifford M. Hardin said recently in Columbus, Ohio.

Secretary Hardin told the annual meeting of the National Association of Animal Breeders that farm prices have not contributed to inflation.

The price at which the public buys its food and fiber from farmers has risen only 7 8 per cent in the last 20 years, he said, while "a recent labor contract called for a 42 per cent increase in wages over the next 42 months.

"I am in favor of people earning good wages, but where is the justice?" he asked.

During the farm price rise of 7.8 per cent, average hourly manufacturing wages jumped more than 100 per cent, and prices farmers pay for all items climbed 52 per cent, the Secretary stated.

Far from contributing to inflation, farmers, whose productivity per man hour has increased twice as fast as in nonfarm industry, have been "holding a handbrake on consumer price increases," Mr. Hardin said.

"If farm prices had gone up either as much as average manufacturing wages or the cost of handling food—from farm to table—consumers would be paying a great deal more for their food."

Agricultural producers have reason to feel encouraged by the current determination to deal forcefully with inflation, the Secretary said

With the cost of resource inputs stabilized, efficiencies and economies in farm operations can lead to more tangible results," he continued "And, greater yields and higher output per unit of investment can improve farmers' profit-making opportunities as demand for their products grows."

The President's new economic policy—part of which is wage-price freeze—is an effort to stimulate our total domestic economy to produce, he said, adding.

"Tax reductions and the spurring of investments in new productive equipment are designed to create new activity and new jobs In due course, these actions should benefit farmers by strengthening and expanding the markets for farm products .

"If the effort works out well, in the way we hope it will, markets overseas could improve for a good many American products This can be particularly significant for farmers and for improved farm income

Last year, we set a triple record—in total volume of farm exports, the value of farm exports, and the sales for hard dollars"

In large part, this resulted from rising efficiency U S agriculture can make an even stronger contribution, "provided other countries will let our farm products compete—and, provided that farmers can harvest and move their products to market when ready." He continued:

"All too often, farmers are caught in the crossfire of labor disputes. The recent rail strike and the present dock strike are good examples.

"Farmers, whose incomes depend on moving the harvest when it's ready, are innocent victims of somebody else's economic warfare. Farmers lose markets and income during the work stoppage, then are caught broadside by the higher costs that folo wthe strike.

"Farmers wish that they, too, could announce an 8 per cent hike at the end of the affair."

Secretary Hardin said the war is being "wound down on schedule and there has been a massive shift from a wartime to peacetime economy. Defense spending that represented 44 per cent of the national budget has been cut to 32 per cent, while expenditures for peacetime programs have increased correspondingly."

He said that during the period of 1965 to 1969, prices were rising at the rate of 6 per cent a year, "and headed higher." Meanwhile, unemployment averaged 6 per cent a year during much of the 60's.

And, while current unemployment is "too high," the rate of inflation has slowed during the past 18 months, and "never in U.S. history havetotal employment, amount of income, and savings been higher," he said.

"Those who for selfish reasons oppose the freeze are out of tune with the needs of the nation, Mr. Hardin said, for "we need to close ranks in the battle against inflation. . . ."

Joseph King Reelected Pa. Truckers President

Joseph J. King Jr, **Penn Dairies, Inc., Lancaster,** was reelected president of the Pennsylvania Motor Truck Association recently during the Association's 43rd Annual Meeting at the Host Farm Resort Motel.

In addition to being named to a second term as president of the statewide trucking organization, King is currently serving as a member of the board of directors of the Lancaster County Chapter of PMTA and has previously served as chapter president and vice president.

Voluntary Isolation Plan Announced for Swine Disease Control

A new approach to protecting swine herds against disease—a Voluntary Isolation Plan — was announced recently by the U.S. Department of Agriculture.

Swine producers who agree to participate in the voluntary plan must set up a special isolation facility on their premises to receive new herd additions and to hold them there for a 30-day quarantine period. The procedures must maintain the rest of their herds independently of this quarantine facility and may divide them into additional isolated units as a further precaution against disease spread.

Although initiated in conjunction with the National Hog Cholera Eradication Program, officials of USDA's Agricultural Research Service said the plan goes beyond offering protection against a single disease. They call it essentially a sound management plan for healthier swine herds, with multiple benefits.

The plan is one recommended by the Secretary's National Hog Cholera Eradication Advisory Committee and the U S. Animal Health Association. Other groups representing the swine industry have approved of the basic concepts.

While any swine producer willing to meet the exceptionally high health and sanitation standards is eligible, the plan should be of particular advantage to owners of large commercial or purebred swine-producing operations.

An obvious benefit of the plan is the potential limiting of disease spread. If contagious disease strikes the isolated herd, it may only be necessary to treat pigs in the isolated unit affected. Or in the case of hog cholera, it may be necessary to depopulate only the unit affected.

Swine producers interested in enrolling their herds in the plan should apply through the State veterinarian or through the Federal veterinarian in charge of ARS's Animal Health Division office in the State.

To be accepted for Voluntary Isolation Plan swine herd designation, a producer's premises must undergo inspection by a team named by the State's Hog Cholera Committee or equivalent organization. Included on the team will be at least one State or Federal regulatory veterinarian.

The inspecting team will prescribe measures needed to establish and maintain the integrity of isolated units and to stipulate other sanitation and health measures.

As a further benefit of the plan, buyers or dealers are likely to have greater confidence in the health status of swine produced on such premises; and the Voluntary Isolation Plan designation may be advertised.

Narvon RD2 Girl Killed In Fall From Wagon

Five-year-old Betty Elizabeth Blank, Narvon RD2, died instantly when she fell beneath the wheels of a hay wagon on the farm of her parents, Daniel K. and Sarah Stoltzfus Blank, Wednesday.

The girl was reportedly driving the mule team on the farm north of White Horse near Chester County when the team bolted. The girl fell backwards into the path of the wagon wheels.

LIMING PAYS

and BAKER'S

AG-LIME pays off BEST!

Liming pays off in healthier soil, better crops, stronger and more productive animals. In fact, it has been estimated that each $1 invested in limestone returns from $3 to $10 in bigger and better yields.

Baker's agricultural limestone pays off best because it does more. Baker's ag-lime sweetens soil to reduce acidity and raise pH level. It also adds vital magnesium. Both are important to make sure that your crops can make full use of the fertilizers you apply.

FALL LIMING IS BEST! All winter long—through rain, snow, freezing and thawing—the limestone seeps down to root depths to put soil into top condition for spring. Choose the brand that meets your needs best. Contact your nearest dealer.

DDT, Only Presently Known Control, Is Banned

Deadly Elm Tree Disease Is Found in Pa. for First Time

A devastating disease of elm trees has been found for the first time in Pennsylvania.

Known as elm phloem necrosis, the disease is caused by a mycoplasm, an organism smaller than a bacterium, but somewhat larger than most viruses. It is spread from tree to tree by the elm leafhopper.

The mycoplasm is injected into the leaves as the insect feeds, then moves down into the roots and kills the inner bark and cambium in the roots and base of the tree. Many trees die the year of infection, but those infected late in the summer may survive and die the following year.

Infected trees tend to die all at once, rather than branch by branch, as elms suffering from the well-known Dutch elm disease. The foliage droops, curls, and wilts, and takes on a rather uniform yellow color. At this stage the inner bark at the base of the tree and in the roots turns the color of butterscotch

If small pieces of this butterscotch-colored bark are placed in a closed jar for a few minutes, an odor of wintergreen can be detected. The color and odor of the inner bark of dying trees are specific symptoms.

As the infected trees continue to decline, the leaves turn brown and may remain hanging on the tree. At this stage the inner bark becomes dark brown Field examination is the only way to determine if an elm has phloem necrosis; there are no means of laboratory diagnosis

Elm phloem necrosis was first discovered in Pennsylvania near Jersey Shore, Lycoming County, by a group of Northeastern forest pathologists on a field trip.

Lester Nichols and William Merrill of the Department of Plant Pathology at Pennsylvania State University later found the infection center at Jersey Shore contained an estimated 1,000 dead or dying elms in an area about three miles long and about one-half mile wide, centered along the new Route 220 bypass.

The disease has long been prevalent throughout the South and Midwest, from northern Georgia to Arkansas, north to central Iowa and Ohio, and from central Kansas and Nebraska east to southwestern West Virginia.

In subsequent surveys no phloem necrosis-infected elms were found in the following counties: Centre, Huntingdon, Blair, Somerset, Westmoreland, Fayette, Washington, Beaver, Lawrence, Mercer, Crawford, Erie, Warren, McKean, Cameron, Potter, Clinton, Bradford, Northumberland, and Union. Other counties have not been surveyed. The origin of the isolated infection center in central Pennsylvania cannot be explained. The leafhoppers could have been brought in by any one of several means, not only from the west, but also from the north, according to Merrill and Nichols of Penn State. Dr. Wayne Sinclair, Department of Plant Pathology, Cornell University, recently found elm phloem necrosis to be widespread and epidemic in the Finger Lakes Region of central New York.

The disease used to be controlled primarily by the application of DDT sprays to kill the leafhoppers. Since DDT is now banned, there is no research-proven control measure. Sanitation by destruction of diseased and drying elms is as important as it is for Dutch elm disease.

Keep Broiler Output Stable, USDA Advises

In the first quarter of 1972, to keep broiler supplies near the same per capita level as a year earlier, broiler producers should produce only two per cent more broilers than they did in the same period of 1971, according to the U S. Department of Agriculture.

USDA's Consumer and Marketing Service makes this recommendation in its "Broiler Marketing Guide for the First Quarter, 1972." Broiler marketing guides are issued quarterly to help the industry plan production to meet the needs of consumers and avoid an under- or over-supply and consequent extremes in prices.

USDA also recommends that the number of pullet chicks placed for the broiler hatchery flock be held at the same level as a year earlier. If further improvements in laying flock efficiency are obtained from the use of Marek's disease vaccine, producers should reduce the number of pullet chicks started accordingly.

Copies of "Broiler Marketing Guide for First Quarter 1972," PMG-22 which contains detailed information on the recommendations, will be available soon from the Information Division, Consumer and Marketing Service, U.S. Department of Agriculture, Washington, D. C. 20250.

For good production next lactation,

FEED PURINA
DAIRY CONDITIONER

As a dairyman, you know that good milk production doesn't just happen. It's something you plan for by establishing a herd with the genetic potential for good production, then managing and feeding your cows so they'll produce up to their bred-in ability.

Many successful local dairymen also plan for good production with a proven program of dry cow feeding. They need Purina Dairy Conditioner, a research-proven ration to help give dry cows body condition they need for good production after they freshen.

Purina Dairy Conditioner is an extra-palatable 12½ percent protein ration. It's fortified with vitamins A and D plus extra phosphorus to help guard against milk fever.

Purina Dairy Conditioner is low-cost, too, because the amounts you feed depend on your cows' condition and on the quality of the roughages you feed. For example, a cow dried off in good condition being fed high-quality roughages would require less Dairy Conditioner than a cow in only fair condition being fed fair quality roughages.

Drop in soon and get your free copy of the Purina Dry Cow Program folder. We'll be glad to show you how Purina Dairy Conditioner can help you prepare your dry cows for good production next lactation.

Freeze Milk for Trips

When you travel or camp and want fresh milk available, you can freeze it for later use, says Mrs. Ruth J. Buck, Penn State University Extension foods and nutrition specialist.

Many families prefer whole, fluid milk for drinking, even though evaporated and dry milk is easy to store, carry along and use.

Mrs. Buck suggests freezing the milk in the original milk cartons Then use the frozen milk as all or part of the ice in the cooler. Or store the frozen cartons in the freezing compartments of trailer or camper refrigerators.

Defrost milk in time for the next meal and shake well before using.

Don't worry if the containers bulge slightly. There is enough headspace so the seal won't break. Remember never to freeze milk in glass bottles.

Expect a slight flavor change, although there is no change in the nutritional value of frozen milk. For anyone sensitive to any flavor change, mix the milk with flavorings or use it in various types of milk shakes.

Because milk is so important for all age groups, freezing fresh whole milk can be one way to carry it along on camp-outs and trips. See that your youngsters get three cups a day Cheese, ice cream, and foods made with milk supply part of the daily calcium, protein and riboflavin needs.

DUNCAN CORN CRIB

Rods Slide Quickly Into Place . . . Lock Panels Into Unbroken Cylinder Of Galvanized Mesh!

NOW, you can own a permanent, lifetime, all steel mesh corn crib for less than the cost of many temporary cribs . . . have all the strength and anti-rust characteristics the galvanized mesh can have. Using the Interlocking joint panel connections you quickly hook together and lock with rods . . . creating an unbroken cylinder of 2 or 5-gauge steel mesh with the ability to stand pressures and strains far in excess of any which may be put upon it under normal use.

The simple "J-bolt" method of attaching the steep roof to the mesh uses the inherent strength of each to reinforce the other. A generous 6 inches of overhang has been provided for greater protection. Interlocking sheets of heavy gauge metal give the "Rod-Lok" Corn Crib roof strength to stand the highest wind and hold the heaviest snowfall. Top cap and half panel on roof removable for easy filling. Large slat door opening. Slats not furnished for door.

High pitch roof approx 45 pitch 24 gauge roof panels.

Mrs. Houser Is Helping With the West Lampeter Fair

By Mrs. Charles G. McSparran
Farm Feature Writer

This week we salute Mrs. J. Wilbur (Elsie) Houser of 1509 Lampeter Road, Lampeter, who is chairlady of the Baked Goods and Homemade Products Department of the West Lampeter Community Fair and a fair director. She has served five years as a director and this is her eighth year as chairman of Baked Goods, although she helped in this department several years prior to being chairman

Last year they had 249 entries in this department which was more than the year before and they hope to have more entries this year than last year. They not only have baked goods but also candy, noodles, honey, beeswax, potato chips, salted nuts, dried beef, smoked sausage, smoked ham or shoulder slices, bacon, lard and homemade soap.

Lampeter Fair, held this year September 22, 23 and 24, is strictly an educational fair and attracts thousands of people. Kenneth Meck is president; David M Huber Jr, secretary-treasurer, Mrs. Robert H. Weaver, recording secretary; Mrs John J. Donnelly, corresponding secretary, and Henry B. Leaman, general manager. Exhibits may be entered Tuesday, September 21 from 7 to 10 p m. or Wednesday from 7 30 a m. till noon

Some of the highlights of entertainment will be a pet show Wednesday from 5·30 to 8 p m, baby beef judging at 7 p.m. and the Lampeter-Strasburg Junior High School Band concert at 8 p.m.

On Thursday, there will be a Talent Contest at 7 p.m., Elementary School Band concert at 7·45 p.m, Queen Of The Fair contest at 8:15 p.m. and a livestock parade at 9 p.m.

On Friday, there will be a baby parade at 10 a.m. and an all western horse show from 2 to 4 p.m and again starting at 6:30 for the evening's entertainment. There will be an FFA fat hog consignment sale at 8 p.m.

Mrs. Houser serves on the summer activity committee which holds a chicken barbecue in June. She helped about 20 other women directors and local women freeze 75 dozen ears of corn and dress chickens for chicken corn soup and make apple sauce for the Community Fair Restaurant which serves hot platters and desserts during the fair. This is a time of fellowship as well as a project to help the fair.

Also, a fair directors picnic is always held in August at the fair grounds. Mrs. LeRoy Andrews and Mrs. Isaac Herr have been co-chairladies of the restaurant ever since it started 15 years ago. The Fair Restaurant has a dairy bar. The FHA, FFA and Varsity Club of Lampeter-Strasburg High School also have food stands at the fair.

Wilbur is chairman of the milk department. They have classes for Holstein, Guernsey, Ayrshire and Jersey raw milk. Housers' son William is a fair director and chaplain and also serves on a committee.

Yes, the Houser family has been active in the fair ever since its inception in 1925. Jacob R. Houser, Wilbur's father, was a director and always exhibited his cattle and apples. He is still on his farm in Lampeter and exhibits apples.

Wilbur and Elsie have always exhibited fruit, vegetables and flowers and Elsie often exhibited canned and baked goods. Their four sons have been entering their Hereford steers for several years and Dwight will exhibit his Charolais steer this year.

Mrs. Houser, the daughter of Mrs. Ada Stoltzfus and the late Elmer U. Stoltzfus of Paradise, grew up on a Guernsey dairy farm and always helped with the farm work. She helped to milk when they did it by hand and later with a milking machine. She says, "I was always a farm girl and like it." She graduated from Paradise High School. She and her husband have always farmed.

Mr. Houser is head DHIA milk tester in Lancaster County. He tests in the Lampeter, Willow Street and Strasburg area. He farmed a dairy farm in Lampeter 11 years, until his health forced him to quit. They then moved to their 12 acre farm where they now live. They have lived here 15 years and he has been a milk tester ever since. About half of that time he has been supervising the other testers in the county. They have about 10 varieties of apples, Bartlett pears, sweet and sour cherries and quinces. They grow all kinds of vegetables on their truck farm and have a stand at Southern Market in Lancaster known as "Houser's & Sons Fruits and Vegetables." Wilbur and two sons tend market Saturdays. Mrs Houser helps pick the vegetables, shell beans and prepare things for the market stand. They buy some fresh vegetables and citrus fruit for their market stand so they have a full line of vegetables all year. They also grow four kinds of peonies and white daisies which are in great demand for Memorial Day. Many people come to their farm to buy fruit and vegetables. They have raised sheep on this farm. Temporarily they do not have sheep.

Mr. Houser and their four sons have received some very distinguished honors. Mr. Houser was the first to get the FFA American Farmer Degree in West Lampeter High School and in the county.

The three oldest sons have FFA Keystone Farmer Degrees. Mr. and Mrs. Houser received a citation for having three sons receive this degree.

All four sons took the ag course in High School and have had 4-H steers and were very active in 4-H. Also, all four sons are active in church work.

James is married to the former Ruth Nauman of Manheim. They have one son. They live next door to his parents and he works for Andrews Excavating Inc. of Willow Street. He received many rosettes for his 4-H Yorkshire swine projects.

William married Judith Miller of Annville and lives at Jonestown RD. He hauls finished lumber for Zeager Brothers who have a sawmill and sell lumber. He spent 2½ years in British Honduras doing voluntary service there. Before going there, he was secretary of the West Lampeter Fire Company.

Thomas and Dwight live at home. Thomas is a mechanic for L. H. Brubaker who handles G.E. appliances and farm machinery.

Dwight is a freshman, enrolled in FFA at Lampeter-Strasburg High School. He has a 4-H steer and a buddy steer. He belongs to Red Rose 4-H Baby Beef Club and Garden Spot 4-H Community Club. He has had three steers. Both boys help with the market stand.

The whole family is active in the Lampeter Fire Company. James is president, Thomas is secretary and Wilbur is chaplain. Wilbur, James, Thomas and Dwight are fire fighters. Housers have a monitoring set in their home for the fire company and Mrs. Houser takes calls. The boys call home from work when the siren goes off to find out where the fire is and go directly to it.

Mrs. Houser is vice president of the West Lampeter Fire Company Ladies' Auxiliary. They serve suppers, serve meals at the Lancaster Kennel Club dog show and have a flea market to make money They use their money to help the Fire Company.

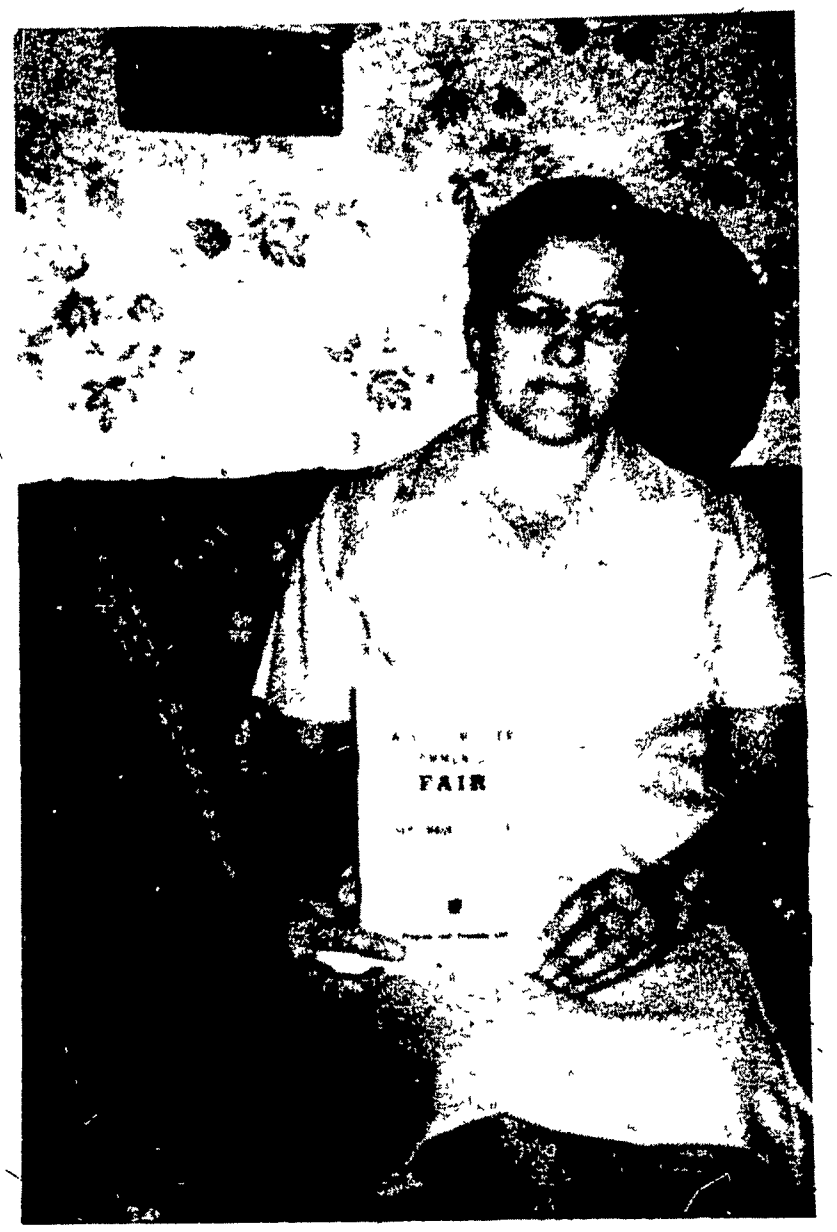
Housers belong to Willow Street Mennonite Church. Mrs. Houser is news co-ordinator for the church bulletins and secretary of the Daily Vacation Bible School which is held two weeks in July.

Mr. Houser was Sunday School superintendent several years He was assistant superintendent of their Bible School when it started many years ago, then superintendent a number of years. He is a substitute teacher now for their Bible School, teaches a Sunday School class and is on the church council. He sings in a church quartette with his brother Jacob Houser Jr., Glenn and Carl Herr. They sing not only at church but also for other groups.

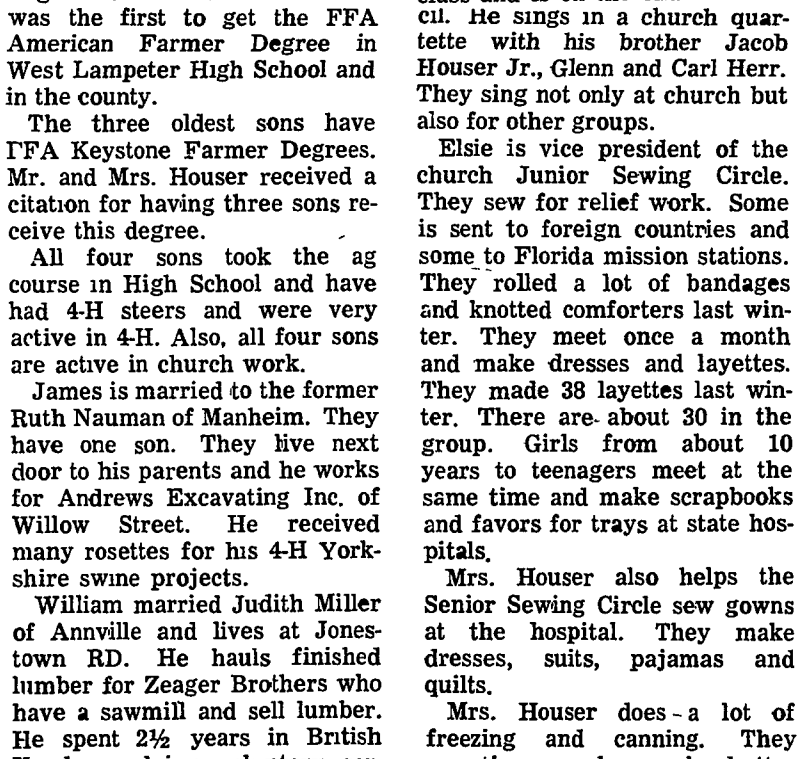
Elsie is vice president of the church Junior Sewing Circle. They sew for relief work. Some is sent to foreign countries and some to Florida mission stations. They rolled a lot of bandages and knotted comforters last winter. They meet once a month and make dresses and layettes. They made 38 layettes last winter. There are about 30 in the group. Girls from about 10 years to teenagers meet at the same time and make scrapbooks and favors for trays at state hospitals.

Mrs. Houser also helps the Senior Sewing Circle sew gowns at the hospital. They make dresses, suits, pajamas and quilts.

Mrs. Houser does a lot of freezing and canning. They sometimes make apple butter and sell it in pint jars. She says, "I enjoy sewing. I used to do most of my own sewing. I enjoy taking care of my roses." Another of her hobbies is keeping a scrapbook of community activities.



Mrs. J. Wilbur Houser, Lampeter, chairlady of the West Lampeter Community Fair Baked Goods and Homemade Products Dept., also supports the fair in many other ways.



Mrs. Houser, who enjoys taking care of her roses holds an Americana rose.

Here is a recipe that won Elsie a first prize at the West Lampeter Fair.

FEATHER SPONGE CAKE

6 egg yolks
½ cup cold water
1½ cups sugar
½ teaspoon vanilla
½ teaspoon orange or lemon extract
1½ cups sifted cake flour
¼ teaspoon salt
6 egg whites
¾ teaspoon cream of tartar

Beat egg yolks till thick and lemon-colored; add water; continue beating till thick, about 5 minutes in all. Gradually beat in sugar, then vanilla, or orange extract. Sift flour with salt; fold into egg-yolk mixture a little at a time. Beat egg whites with cream of tartar till stiff peaks form. Fold into first mixture, turning bowl gradually. Bake in ungreased 10 inch tube pan in slow oven (325 degrees) about 1 hour. Invert the pan to cool.

APPLE-CINNAMON TARTS

Boil to a syrup (about 5 minutes):
1 cup sugar
1 cup water
½ teaspoon red food coloring if desired

Place in a greased shallow 8" X 12" baking dish:
1½ lbs. tart apples (4 to 5 medium-sized apples, peeled and thinly sliced

Pour syrup over apples.

Sift together:
1½ cups sifted flour
2 teaspoons double-action baking powder
½ teaspoon salt

Cut in with pastry blender or 2 knives or a fork until mixture looks like meal — ¼ cup shortening.

Stir in to make soft dough — ¾ cup milk.

Drop 12 spoonsful of dough on top of apples and make a dent in top of each. Place in dented dough a mixture of 2 tablespoons melted butter or margarine, 2 tablespoons sugar and ½ teaspoon cinnamon.

Bake 25 to 30 minutes in hot oven (450 degrees). Serve warm, with cream or rich milk if desired. Serves 8 to 10.

CRACKER PUDDING

1½ qt. sweet milk
1 cup grated crackers, rolled not too fine with rolling pin (Eagle Brand crackers preferred)
½ cup grated coconut
1 cup sugar
Yolks of 2 eggs, beaten
1 teaspoon vanilla

Scald milk and add gradually to beaten egg yolks and add sugar, cracker crumbs and coconut. Cook in a pan on top of stove, stirring constantly until cracker crumbs are soft and mixture is thick. Remove from heat and add vanilla. Pour into buttered baking dish. Spread with meringue made by beating 2 teaspoons sugar and ⅛ teaspoon vanilla into stiffly beaten egg whites.

Bake until meringue is golden brown at 350 degrees.

STRAWBERRY SHORT CAKE

½ cup butter
1 cup sugar
2 eggs, well beaten
½ cup milk
1¾ cups cake flour
¼ teaspoon salt
3 teaspoons baking powder
¾ teaspoon vanilla

Cream butter, add sugar. Add eggs and beat briskly. Add sifted dry ingredients alternately with milk. Add vanilla.

Blend well. Pour into buttered square 8" baking pan. Bake at 350 degrees for 40 minutes. Serve with ripe strawberries, raspberries or peaches.

ROOT BEER DRINK WITH GINGER ALE

1 bottle Hires Root Beer extract
8 cups granulated sugar
13 qts. cold water
6 qts. ginger ale

Shake bottle of root beer extract well before using. Pour contents over sugar and mix well. Add water and stir to dissolve sugar. (To chill quickly substitute ice for water.) Add ginger

(Continued on Page 19)

Farm Women Societies

Society 1

A Plant and food sale was conducted at the Society of Farm Women 1 meeting Saturday afternoon at the home of the Stauffer sisters, Lititz RD3. Mrs. Neil Clark was the auctioneer. Twenty five members attended.

Mrs. Graybill Hollinger, president, presided at the meeting. She announced that the women would be sewing at the Lancaster General Hospital from 9 a.m. to 2 p.m. on Tuesday, October 12.

The Lancaster County Farm Women's convention will be held at the Farm and Home Center November 6. Tickets may be obtained from Mrs. Hollinger. Cost of the tickets is $3. A luncheon will be served at noon.

Membership dues are payable at the next meeting. Members are asked to bring program suggestions for the coming year to the meeting.

Farm Women interested in helping to make applebutter at the Landis Valley Museum Saturday, October 2, are asked to contact Mrs. Willis Bucher.

The ways and means committee, Mrs. Bucher, chairman, is planning a sub sale to be held Thursday, October 14. Orders must be in by Saturday, October 9. Members will meet at the home of Mrs. Clayton Sangrey at 7 a.m. October 14 to make the subs.

A Book Review, presented by Mrs. Mildred Eiseman, will be given at the next meeting to be held at the home of Mrs. Bucher, Lititz RD2, at 1:30 p.m. Saturday, October 9. Mrs. Martin Hess will be the co-hostess Mrs. Elmer Hershey will present the devotions.

Society 6

Farm Women Society 6 elected Mrs. H. G. Shonk Society president during a recent meeting at the Stevens Hill Church of the Brethren, Middletown RD.

Assisting Mrs Shonk will be Mrs. Paul Brandt, vice president; Mrs. Bernard Thome, treasurer and Mrs. Mark Geyer, corresponding secretary. Miss Kathryn Miller will continue as recording secretary.

Mrs. Geyer served as hostess for the meeting. Devotions were led by Mrs. C. R. Frey.

Plans were made for the Society to visit and entertain patients at the Harrisburg State Hospital. In other business, the group voted approval of a refreshment stand to be operated by the Society at the Dale Berrier

Ida's Notebook

By Ida Risser

It surely does get quiet around here during the day now that the children are back in school.

Of course, there is the drone of the tractor as the big silo is filled for the first time. And I do rattle a few kettles and pans as I can the bountiful harvest from my garden.

So the hours pass quickly and soon it is time to meet the three buses that take each child to a different school.

With three buses morning and afternoon for the next three years, I figure there will be over 3,200 deadlines to meet — what a prospect.

* * * *

Last week we tried a recipe for soft pretzels. Our problem was that they were too light in color.

This enterprise inspired us to visit that historic town of Lititz and really see how pretzels are made. We found Lewis Sturgis very obliging as he explained that they should be dipped in straw water and potash. He is 89 years old and the last of 14 children of Julius Sturgis who founded America's oldest pretzel bakery in 1861.

My children enjoyed the story of the folded arms of children in prayer being the inspiration for the shape of the pretzel. Watching a machine twist 50 pretzels per minute intrigued us and showed the significance of machinery in modern production methods.

* * *

For the past several weeks, I've had a new sight to watch on the Conestoga Our son Kenneth gave me six geese after I told him the enjoyment I got from seeing the neighbor's ducks paddle around They are a beautiful sight and a much appreciated gift.

Now, if only they don't decide to roost every night on my cement walk at the front porch

Lampeter

(Continued from Page 18)

ale Stir. Makes 5 gallons. Can make half of the recipe Extract keeps indefinitly Tastes like old fashioned root beer made with yeast.

SIX LAYER DISH

Place in casserole in this order:

Thick layer of raw potatoes
½ cup rice over potatoes
A thick layer of onions
1 layer sliced raw carrots
1 lb. of hamburger
1 qt. of canned tomatoes or less
1 tablespoon salt
1 tablespoon of brown sugar

Sprinkle pepper on top Bake at 350 degrees for 2½ hours

HOLLAND STONE
a luxury you can afford

Holland Stone was created especially for the innovative builder. It is unique in that it affords the builder an opportunity to design with the look of hand-cut stone at the lower cost of split face building units. Actually a man-made stone, Holland Stone is an exacting blend of stone aggregates that lend their natural colors for lasting beauty and permanence. Ten distinctive colors, plus a wide variety of shapes and sizes, offer a wealth of design potential for residential, commercial, institutional construction. Almost any exterior or interior decorating motif can be achieved . . . from classic to colonial to contemporary

Ladies, Have You Heard?

By Doris Thomas, Extension Home Economist

Pesticide Containers Not Safe

Did you know that one of the most common causes of pesticides accidents is the "empty" container?

THOMAS

In fact, no pesticide container is ever completely empty — there is always some active material clinging to the inner surface.

Burning is not a good method of disposal and is no longer recommended. The particles and vapors generated in burning pesticide containers can pollute the air and endanger people, animals and plant life. And local ordinances, in some areas, prohibit the burning of empty pesticide containers.

Under a grant from the Agricultural Research Service of the United States Department of Agriculture, a new prototype of a controlled incinerator is being tested. The Mississippi Agricultural Experiment Station scientists, who are conducting the experiment. are also testing to find what materials pesticide containers should be made from to make possible disposal by incineration.

"Empty" pesticide containers, particularly aerosol cans, can be attractive and dangerous to children. Many of them have been picked up on vacant lots, or from trashcans and used for their "last squirt."

Few people will argue the effectiveness or necessity of pesticides in agriculture and around the home. But, pesticides are poisons, at least to some degree, and being highly toxic, present problems that concern all of us.

Use caution when you dispose of the empty pesticide containers around your home. If you live in an area where your trash is collected and taken to sanitary landfills, this is the safest method of disposal.

If you must dispose of trash on your own property, select a site that is isolated and protected from accidental entry by domesticated animals, wildlife and children.

Sewing With Fake Fur

New fake fur fabrics can make stylish garments for fall and winter. And these fashions are fun to wear.

But take care to choose the correct pattern for the fabric you select.

Usually you select a pattern before you buy the fabric. But when sewing with fake fur, you should decide on each before buying either the pattern or the fabric.

Let the fur-like fabric you choose serve as a guide to the pattern you choose Usually a pattern with a simple design and few seams is best.

You'll find fake fur fabric available in short pile, medium high, and deep pile — and in a wide variety of patterns ranging from Persian lamb to opossum

The lightweight, flexible fake fur is easier to work with — so you might choose a pattern with some detailed design. The bulkier, deep-pile fabrics require a simple design.

Take into consideration the type of fastening needed on garments while you're selecting the pattern. It's possible to make buttonholes on some of the fake furs, but you may rather use some other types of fastenings such as frogs or the new decorative chain and button closings.

Shop carefully for pattern and fabric when you're planning to add fake fur fashions to your wardrobe.

Grange Young Couples to Meet

Young couples in the Pennsylvania State Grange will develop their own program of activity in that organization at a special weekend encampment September 24-26 at Edgewater Acres, near Alexandria, Huntingdon county.

Mr. and Mrs. Kenneth Schlegel, Fleetwood RD3, state youth cochairmen, said a young couple-of-the-year for 1971-72 will be selected and inducted at a coronation ceremony that is to feature a banquet the night of September 25. O. Walker Shannon, former state overseer and lecturer, will be speaker.

Mr. and Mrs. Henry Huber, West Chester, current reigning couple, will assist with the coronation. In charge of the three-day event are Mr. and Mrs. Robert Gruber, Greenville, state young couple for 1969-70.

Workshops on planned parenthood and local government will be conducted under the direction of Mr. and Mrs. Paul Kenpp, Allensville. The Hubers will have charge of recreational activities.

A. Wayne Readinger, Harrisburg, state master, said the encampment and program to be developed will help fill a void in grange work for young marrieds, many of whom have multiple demands on their time from starting farming and attention to young children of their own.

Farm Women

(Continued from Page 19)

farm sale in Elizabethtown on Oct. 2.

Mrs. Milton Eberly, president, announced that tickets are still available for the visit of Nan Wiley Oct. 1 at Centerville Junior High School auditorium. Mrs. Jack Henderson, Lancaster RD6, is in charge of tickets for the performance which will benefit the county project of the Farm Women which is the Child Development Center.

In other business, the women slated a visit for the group to the Corning Glass Works on Oct. 13.

"The Art of Cake Decorating" was the theme of a lecture-demonstration by Mrs. Richard S. King, Mountville, a member of Society 4.

Next meeting of the group will be held at 2 p.m. Oct. 10 at the home of Mrs. Bertha Keller and Misses Lela and Stella Coble, Elizabethtown RD3.

Society 7

Farm Women Society 7 held their September meeting at the home of Mrs. Charles H. Rohrer, Paradise, with the cohostess, Mrs. J. Arthur Rohrer, leading devotions.

Resignations were accepted from Mrs. Roy Lawyer and Mrs. Menno Stauffer.

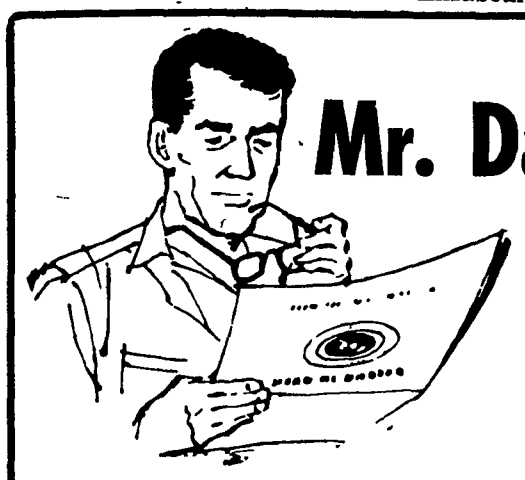
A donation of $50 was given to the county project, the Lancaster Child Development Center. Money was also donated to the nutritional program for Lancaster County underprivileged and to the Needlework Guild. It was decided that a benefit for the Darlene Weidman Fund would be held to defray future expenses. Society women volunteered to be hostesses to German women touring Lancaster County.

Tickets for the Nan Wiley program on October 1 at the Centerville High School are available through the president, Mrs. Mildred Hersh. Announcement was made of the County Convention to be held November 6 at the Farm and Home Center.

Mrs. Hazel Crankshaw presented original poetry and prose as entertainment.

The October meeting will be the birthday luncheon to be held at the Good and Plenty Restaurant at 12:30 p.m. October 9. The program, under the direction of Mrs. Carlton Homsher, will be 'Fashions Old and New' with members modeling their own clothes from the year 1900 to the present as well as fashions from Dee E. Gee Shop in Strasburg.

(Continued on Page 23)



Mr. Dairyman

HOW MUCH WOULD AN EXTRA TON OF MILK PER COW MEAN TO YOU?

Many dairymen who have challenged their herds — who have fed for more milk — have found that their cows can often produce as much as 2,000 extra pounds of milk per year when fed the PIONEER way.

Management for profit the PIONEER way can mean big additional earnings for you. That's why thousands of successful dairymen rely on PIONEER feeds and feeding programs to help them milk out the total bred-in production capability of their cows — to help them get more profit from each cow.

Challenge your herd! Find out how good your cows really are. Stop in soon and talk over your production problems with us. Remember, there's a PIONEER feeding program to fit your need.

Schaefferstown Fair Slated

The fourth annual Harvest Fair will be held at Schaefferstown Saturday September 18 and Sunday September 19 The time will be from 10 a m to dusk on Saturday, and 12 noon to dusk on Sunday on the Old Schaeffer Farm in Schaefferstown

Traditional Fall Activities such as schnitzing, apple butter boiling, cider making, threshing, corn meal grinding, cooking demonstrations will take place each day.

There will be an art exhibit on the barn floor First, second and third cash prizes will be awarded, plus a fourth which will be a people's choice

Craftsmen will be demonstrating knitting, egg decorating, tatting, cigar making by hand, tin smithing, candle making, tole ware painting, ceramics, chair caning, plus many other old time skills

A highlight of the Harvest Fair will be the aroma of baked bread, once daily in the 18th century brick oven

Another highlight will be the First Annual Eastern Pennsylvania Horse Plowing Contest Saturday September 18th only at 1 p m Cash prizes will be awarded to the winners in seven different categories

Local people, farmers, FFA, FHA, and 4 H members will be exhibiting grain, fruits, vegetables, canned goods, floral arrangements, sewing crocheting, knitting, and other articles Cash prizes will be offered

There will be entertainment both days Saturday will feature the Heidelberg Polka Band at 12 noon Denim Dueters (from Robesonia) at 2 p m and 4 p m, Minute Men Quartette at 3 p m and 5 p m, Bag Pipe music at 5 30 p m, and a Hymn Sing at 6 p m led by the Minute Men Quartette

Sunday's program will feature The Heidelberg Polka Band at 12 noon Farm Womens Kitchen Kooks at 2 and 4 p m, G T V Edelweiss of Reading Liederkrantz (Bavarian Folk Dancers) 3 30 and 5 p m Mixed Quartette from St Paul's UCC of Schaefferstown, at 3 p m and Mixed Octette from the Heidelberg Brethren Church of Reistville

Food will include sausage sandwiches, pork and sauer kraut, vegetable soup, funnel cakes, hot beef sandwiches, hamburgers, hot dogs, french fries, ice cream

Admission each day will be $1 for adults and 25 cents for children

At the annual art exhibit, all works must be set up between 8 and 9, a m Saturday for the judging to take place at 10 a m. Each artist is responsible for hanging or placing his work. Each artist is limited to six works

Cash prizes will be awarded. For additional information contact Mrs Benjamin (Judy) Eberly Jr in Schaefferstown. Call 717-949-3790

Poisonous Sumacs

Poisonous sumacs can be recognized because their berries always hang in clusters The red berries of the harmless sumacs are in dense, erect clusters. The poison sumac has white berries

Farm Women

(Continued from Page 21)

Society 10

Farm Women Society 10 met recently in the Refton Fire Hall with Miss Ida Kunkle, Mrs. Jennie Shoemaker and Mrs. Charles Sherts serving as hostesses.Miss Kunkle was in charge of devotions and Mrs. Jacob Evans, president, was in charge of the business meeting.

The program featured Miss Karen Carl, Ronks, a student at Conestoga Valley, with a musical presentation at the piano.

A donation of $20 was approved for the United Fund. A gift of $15 was sent to the Extension service for the youth nutritional program, and a $10 gift was given to the Hans Herr Association in memory of a deceased member.

Mrs. Evans asked that members invite friends to attend the evening with Nan Wiley so that the society may go on record as selling the allotted number of tickets. The program planned for 8 p.m. on Friday, Oct. 1 is open to the public.

The next meeting will be held Oct. 2 at the home of Mrs. John Esbenshade, Eden.

Society 13

Farm Women Society 13 met recently at the home of Mrs. Ervin Brown, 2116 New Holland Pike. Devotions were led by Mrs. Brown. Roll call was answered by giving a household safety tip.

Prior to the business meeting the group sewed cancer pads. The Society has completed 382 pieces of sewing for the Cancer Society during the 1970-71 seasons.

The Society will hold a 40th Anniversary banquet at the Akron Restaurant November 9.

The next regularly scheduled meeting will be held at the home of Mrs. Robert Bomberger, 217 Hillcrest Rd., New Holland , November 12.

Society 22

Society of Farm Women 22 met in the home of Mrs. Clarence Rohrer, Smoketown, with Mrs. John Harnish as co-hostess. The program featured Edward J. Rolland from the Pennsylvania State Police, who spoke on the 'Prevention of Crime Against Women.'

During the business meeting, Mrs. Lloyd Herr, president, reminded the group that tickets for the 'Evening With Nan Wiley' on Oct. 1 at the Centerville Junior High School are still available.

Announcement was made that the County Convention will be held at the Farm and Home Center on Nov. 6.

The guest speaker will be Miss Marie J. Gite, Chambersburg.

The incoming president, Mrs. Jay Landis, appointed the following committee chairmen: program, Mrs. Harold Rudy; social, Mrs. Melvin M. Martin; sunshine, Mrs. Harold Zook; membership, Mrs. John Harnish; auditing, Mrs. Wilmer Andrews; ways and means, Mrs. Carl Diller; cookbook, Mrs. Paul A. Witmer; news reporter, Mrs. Harold Ranck.

The next meeting will be held in the home of Mrs. Carl Diller, 2112 Southview Rd., Lancaster, at 9 a.m. Oct. 12.The group will spend the day coalating the third edition of the 'Dinner Bell Cookbook.' Each member is to bring a covered dish.

The Society will be entertained by Society 14 on Oct. 13 in the home of Mrs. Murl P. Clark, 203 N. Decator St., Strasburg.

Society 24

Farm Women Society 24 met recently for a craft workshop at the home of Mrs. Marvin Martin, New Holland RD2. 25 Christmas ornaments were made for Conestoga View.

Assisting Mrs. Martin as cohostesses were Mrs. Leah Bushong and Mrs. Russel Bomberger. Devotions were in charge of Mrs. Bomberger.

Plans were set for a rummage sale to be held in the Bareville Fire Hall on Oct. 5 beginning at 8 a.m. A gift of $25 was sent to the youth nutritional program to provide food to be used in demonstration classes held by the Agriculture Extension Service.

Members of Society 24 entertained patients at Embreeville State Hospital Sept. 17.

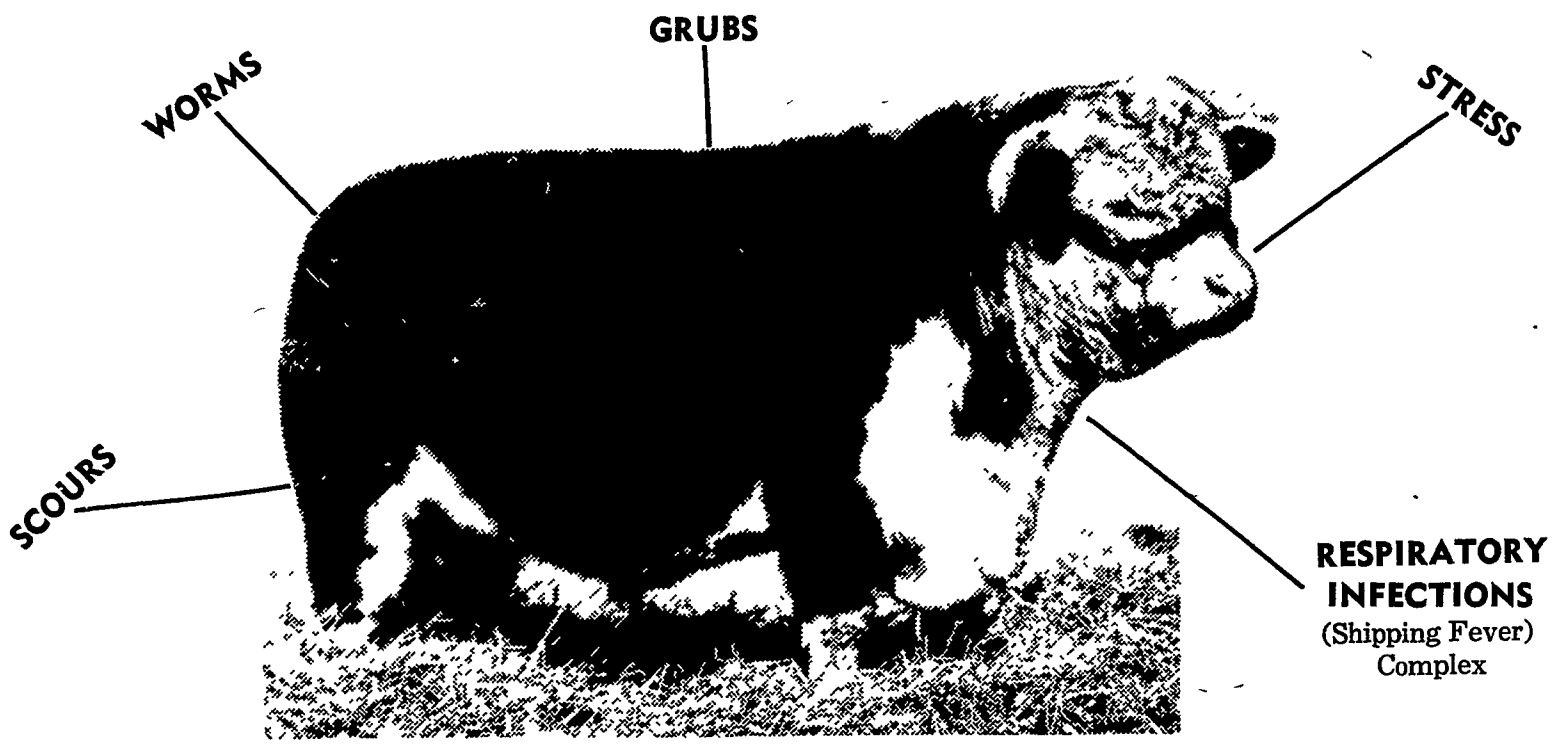
AGWAY

BEEF BOOKING PROGRAM

AGWAY BEEF MIX 55% AND 32% WITH OR WITHOUT DRUGS



Maintain growth & weight gains

FEEDER CATTLE HEALTH PROBLEMS?

AGWAY HAS THE ANSWERS!

STRESS and SHIPPING FEVER COMPLEX: Feed Aureomycin S700 Crumbles 1-6 lb.-head-day for first 28 days to reduce effects of shipping fever and maintain appetite, growth and weight gains.

MAINTAIN GROWTH and WEIGHT GAINS: Feed Aureomycin Crumbles (2 gm.-lb.) 1 lb.-20 head-day to prevent foot rot and liver absesses and reduce bacterial diarrhea and maintain growth and weight gains.

SCOURS and SHIPPING FEVER: Drench with Sulmet 12.5 percent solution; For winter dysentery (bloody scours) use Agway Diarrhea Bolus.

GRUBS: Apply Coral 4 percent Pour-On in Sept. or Oct. to prevent damaging effects of cattle grub larvae.

WORMS: Treat cattle on arrival with Thibenzole Bolus, Drench or Top Dress Pellets.

PINK EYE: Treat cattle with Agway Eye and Wound Spray.

FLIES and LICE: Hang Agway 3 percent Ciodrin Dust GBags in feed lots or pasture, or spray with Agway Ciodrin Concentrate.
